

I do not want any radio station to take the place of my Air1 radio station. It is a radio station that my community benefits from greatly because it is positive music, and you never have to worry about something being said that could be offensive to anyone. I believe that the service provided by Air1 is in the best public interest because it is uplifting music, it has a wonderful message, and I believe in this station so much that I support financially to this station every month. Air1 is a huge part of my everyday life, and would be very sad to not be able to turn on my radio everyday and hear the music that me and my family love so much.
